

LLK & Century 22 AG Merger

LLK is happy to announce that Century 22 AG will be joining our team, expanding our company's southeastern national outreach. Located in Lake City, Florida, Century 22 AG has collaborated with our team at LLK on numerous projects and has become a reliable and trusted partner of ours. As Century 22 AG transitions from an independent partner to a member of the LLK family, we are confident that this merger will allow us to provide an even better level of service for our customers.

Specializing in the construction of greenhouses, Century 22 AG will provide LLK with an even greater reach and improved coverage services by having at hand a specialized unit in the southeast corridor. This merger grants LLK a construction crew that will be ready to mobilize quickly and tackle projects ranging from storm damage and loss mitigation to the most complex design projects.

We could not be more thrilled to have them join the LLK team and are looking forward to evolving into an even better consolidated solution provider!
