

## WATER TREATMENT BENEFITS

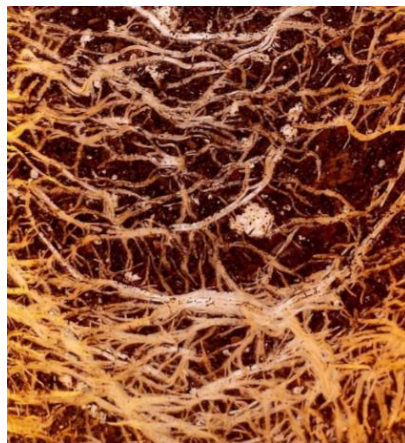

-  **Save Money**  
Control waterborne pathogens at rates far less than traditional fungicides
-  **Equipment Longevity**  
Reduction of corrosion results in long term functionality
-  **Eco friendly**  
Environmentally friendly profile that breaks down to table salt
-  **Save Time**  
Sanitize your greenhouse while irrigating - time is money
-  **Peace Of Mind**  
OMRI certified solution
-  **Grow Better**  
Start clean, stay clean approach = plant growth

## OXINE® WT SOLUTION

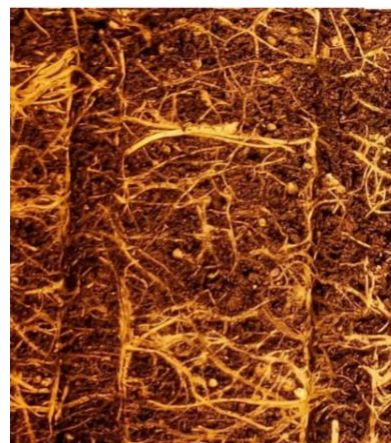

-  **Proven Sanitizing Agent**  
Chlorine Dioxide is widely viewed as one of the most effective water treatment solutions
-  **Patented Technology & Delivery System**  
Oxine® WT is a state-of-art, controlled release formulation that eliminates pathogens in irrigation water throughout the facility
-  **OMRI Certified**  
Safe for irrigating vegetables, flowers and cannabis
-  **Organism Controlled**

Pythium	Erwinia	Colletotrichum
Fusarium	Rhizoctonia	Cylindrocladium
Phytophthora	Ralstonia	Thielaviopsis
Pseudomonas	Alternaria	Xanthomonas
Botrytis		
-  **Applications**  
Closed loop systems/Irrigation systems/Facility disinfection Water system disinfection for biofilm removal & control Bacteria, mold and odor control throughout facility

## OXINE® WT RESULTS

Plant grown with 2 ppm of Oxine® WT in the irrigation water

Plant grown without Oxine® WT in the irrigation water
